

# TRAINING

## Workforce Training & Development

Industrial Fabrics Association International and The Makers Coalition offer various employer solutions for workforce training and development, providing a broad range of fee-based services in the areas of curriculum, customized training, education, apprenticeship, testing and certification, troubleshooting and consultation.

## Trainings Offered

### Apprenticeship

A proven workforce development tool which provides on-the-job training in a supportive environment.

### Customized Industrial Sewing Training Curriculum with Training Modules

Employers can refer employees for training held with partner organizations and educational institutions, or training can be conducted at the work site. Training can be made as simple and as flexible as possible. Employers can use the entire 192-hour curriculum, or select individual training modules. It could also be further customized for specific employer/industry. Training can be provided to new hires and/or incumbent workers.
